Novel Endoscopic mucosal resection device

Brief description: Participation in the development of a novel endoscopic mucosal resection device (Endorotor™, Interscope, Inc.). In vitro and in vivo experience in approved animal labs in the area of Boston, MA. CBSET, Inc. Study Number: RJX00002, IACUC Project Number: I00165. Abstract of work was presented at the 2015 Digestive Disease Week meeting in Washington D.C. This device intends to provide an alternative and/or adjunct to the current methods of endoscopic mucosal resection. It may be useful for clean up after piecemeal polypectomy or in replacement for cold snare polypectomy
